PROFESSIONAL SUMMARY

Analytical and detail-oriented Geophysics graduate with hands-on experience at a utility company, contributing to data analysis, GIS mapping, project management, and technical reporting. Skilled in Microsoft Office Suite, Power BI, and GIS tools, with strong analytical thinking, teamwork and communication skills. Seeking an entry level role to add value and grow within a dynamic, growth-oriented organization.

WORK HISTORY

National Youth Service Corps (NYSC)

Eko Electricity Distribution Company, Marina, Lagos, Nigeria **January 2025 – December 2025**

- Designed template for capturing and tracking technical projects enabling effective supervision and report of project progress.
- Supervised the process and worked closely with the contractor for the safety audit of distribution transformer and other assets across EKEDP network.
- Contributed to the data cleaning, modification and mapping of EKEDP assets
- Actively involved in the site inspection of physical infrastructure with the Seimens Energy team across EKEDP network to provide visibility into the physical condition and distribution of the network

Student Industrial Work Experience Scheme (SIWES)

Gibat Geosearch Nigeria Limited, Ilorin, Nigeria **June 2023 – December 2023**

- Facilitated drilling operations through continuous monitoring and reporting of geological data.
- Processed and interpreted geophysical data using Surfer and Winresist, producing groundwater potential maps delivered to clients within project timelines.
- Supervised drilling operations for 15 successful boreholes, ensuring compliance with safety and environmental standards.

TECHNICAL SKILLS AND COMPETENCIES

- **Data Analytics:** Microsoft Excel (Power Query, Pivot Table) | Power BI | SQL
- **GIS & Spatial Analysis:** ArcGIS | QGIS | Google Earth | Field Maps
- **Professional Competencies:** Attention to details | Communication | Teamwork | Problem solving | Documentation and Reporting

EDUCATION

University of Ilorin, Ilorin, Nigeria **October 2019 – August 2024**

- B.Sc. Applied Geophysics (Second Class Upper Division)

TRAINING & WORKSHOP

Microsoft Power BI (PL-300 Certification) **In view**

Data Analytics Training, TS Academy

May 2026

- Executed end to end data analysis projects including data cleaning, processing, and analyzing complex datasets using Excel, Python and SQL to improve data integrity
- Developed interactive data visualizations and dashboards in Power BI to translate industrial findings into clear insights for stakeholder presentations.
- Apply statistical analysis testing to identify key trends and patterns to support data driven decision-making frameworks.
- Collaborated in cross-functional team to work on assignments to define requirements, deliver analytical reports and provide recommendations based on quantitative evidence

Microsoft Power Platform Virtual Training: Fundamentals (PL-900) September 18, 2025

- Completed training on building applications with Power Apps, automating workflow with Power Automate, analyzing data with Power BI, creating self-service portals with Power Pages and developing AI solutions with Copilot studio.

Workshops:

Thematic and DEM Mapping Workshop, DigGeoNaija

February 15, 2025

- Completed hands-on training in Thematic mapping and Digital Elevation Model (DEM) analysis, enhancing geospatial data visualization skills.

Basic Petrophysical Analysis Module, 2024 NAPE Young Professionals Technical Workshop, Kwara State University (KWASU), Malete, Nigeria.

February 17, 2024

- Developed foundational skills in petrophysical analysis, including log interpretation and reservoir characterization.
- Received a Certificate of Participation, endorsed by NAPE leadership.
